TOMAK RAILINGS – SIMPLICITY WITHIN COMPLEXITY

Tomak was founded in 1993 by the late Haim George and his son-in-law Simon Bieler.

Simon is the CEO – second generation die & tool maker who named the company after his two children Tom & Karin hence Tomak.

Tomak is a market leader of metal & glass works in.

Tomak specializes in metal & glass applications from simple hand railings, up to complex steel & glass structures, including custom made due to client specifications.

Tomak is a family business with professional dedicated team following the company over 20 years.

Tomak handles all its design development & engineering in house & even models, samples & testing are executed by the team.

Tomak has high-end computerized machinery experienced workforce, a spotless reputation at the market with the most prestigious clients all over the country.

For 3 decades **Tomak's** long experience in metal & glass industry reflects our products and service to deliver smart & easy balustrade solutions using our own system.

Simon Bieler –

Born in the UK in 1963, Simon Bieler is the owner, manager and founder of Tomak.

He followed in the footsteps of his late father, Alfred Bieler, a skilled die and toolmaker from Germany, who was among the first workers at ISCAR International.

At the age of six, Simon discovered his passion for the industry while visiting his father's toolmaking department. From that moment, his fascination with research, design, and the development of metal products began—and only grew stronger over the years.

For more than three decades, Simon has been leading Tomak, continuously bringing together top professionals and experts. He remains personally involved in the company's unique and innovative production, design, and product development processes.

Tomak designs, manufactures, and installs balustrades in various materials and combinations, including glass, stainless steel, and aluminum.

Simon Bieler Already in the industry

Tomak Dry Glazing Railing Glass System

INVESTORS & COLABERATIONS

TOMAK SIMPLICITY WITHIN COMPLEXITY

Thanks to our extensive technical knowledge and many years of research experience, we have developed inhouse system for unique, dry glazed glass railings that have been tested and proven to be very effective. The system offers solutions for special installations in unusual forms in various prestigious projects across the country.

Our fully equipped design and development workshop as well as our extensive machining and tooling expertise made us an ideal partner for architects, designers and entrepreneurial Projects. We worked with them to convert their concept designs to reality. Anything they imagined it, we found the best way to manufacture.

we have built our reputation on creativity, innovation, excellent service and uncompromising quality both for our products or our fully customized project services.

Due to installation fo thousands of meters of glass balustrades we developed our own Universal Dry Glazing System. TOMAK's current product systems include: a registered patent for dry glaziing railing system a professional-grade DIY aluminum home fencing system a glass+aluminum banister system.

As part of "Startup Nation" we have made a technological breakthrough in our field, We are seeking involvement of large companies, who present strong advantage and assist in commercialization, manufacturing and in opening the door to global markets. If you are such company, you may benefit from collaborating with us, by sharing the risk of r&d investment and relying on our knowledge, facilities and expertise for innovative product development and market penetration.

In order to encourage the creation of partnerships in, the Innovation Authority operates a dedicated Global Enterprise R&D Collaboration Program.

If you are seeking for new product innovation to market and wish to get more info contact us and we will meet you for more details.

Our team shares the visionary of all in one tailor-made on-site solutions with the most resourceful out of the box thinking – come join us for an outstanding future opportunity.

Transmission of the certificate for a European patent pursuant to Rule 74 EPC
The certificate for a European patent is herewith transmitted.

The European patent specification can be downloaded from the EPO publication server
<https://data.epo.org/publication-server/> (see OJ EPO 2005, 126).

Note:
A corrected title page of the European patent specification will be published, if the bibliographic data have been changed after completion of the technical preparations.

PCT Pub. Date: **Mar. 29, 2018**

Abstract
A plate outlining device is configured to couple with an external 4-shaped plate profile. The device includes an external segment corresponding to shape in the external 4-shaped plate profile and configured in 3D blocks. The external segment includes a section aligned to at least partially accommodate an external alignment tool through a passage serving as a mounting point for the external alignment tool, and an internal segment that is configured to accommodate a section of the plate. The internal segment comprising an alignment tool wedge-like portion capable of accommodating a tip of the alignment tool.

UNITED STATES PATENT AND TRADEMARK OFFICE

ISSUE NOTIFICATION

The projected patent number and issue date are specified above.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Application filed on or after May 29, 2000)

The Patent Term Adjustment is 307 day(s). Any patent to issue from the above-identified application will include an indication of the adjustment on the front page.

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-273-7702. Questions relating to issue and publication for payments should be directed to the Application Assistance Unit (AAU) of the Office of Data Management (ODM) at (571)-272-4200.

INVENTOR(s) (Please see PAIR WEB site <http://pair.uspto.gov> for additional inventor(s).)
Shimon Lavi BAKER, Nahariya, ISRAEL;
Me BRODCKER, Nahariya, ISRAEL;

APPLICANT(s) (Please see PAIR WEB site <http://pair.uspto.gov> for additional applicant(s).)
TOMAK LTD., Moskov Pongla, ISRAEL.

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The USA offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to encourage and facilitate business investment. To learn more about why the USA is the best country in the world to develop technology, manufacture products, and grow your business, visit SelectUSA.gov.

SMART SYSTEM

INNOVATIVE FEATURES & PATENTED ELEMENTS

- * A UNIVERSAL CHANNEL DESIGN – SIMPLE & SYMMETRIC – adaptable to all site conditions with intermediary brackets.
- * LEVELING DEVICE integrated into the profile to ensure precise alignment
- * LEVELING ALIGNMENT MECHANISM®
Easy glass positioning adjustment with a simple lever motion.
This unique PATENT- ALIGNMENT MECHANISM allow you know the glass angle by watching the lever direction.
- * POSITION & LOCK the glass panel, at any angle using our PATENT- TRIPLE ACTION LOCKING SYSTEM®.
- * Unique design grips top and bottom for maximum strength.
- * Our CLIP-ON cover solution suits all building types facades and designed to interface with any wall finish: Drywall, tiles, glass, wood, masonry, etc.

WHY CHOOSE OUR SYSTEM

- * Universal profile • Minimal stock • Maximum efficiency.
- * Multiple clip-on cover options – compatible with every facade and wall finish.
- * Smart & Easy Balustrade Solutions – Backed by Decades of Experience
- * Cantilever mount for a clean, floating look.
- * Unique alignment mechanism **Patent** – ensuring perfect glass line-up.
Triple action **Patent** Locking system.
- * Our system's alignment and locking mechanism allow installation from **inside the balcony**, eliminating the need for lifting platforms and saving both **TIME & MONEY**.
- * Our dedicated team simplified the design and ordering process, making it easier than ever.
- * TÜV tested & certified.
- * Our system comply with the **ABZ** German standard.

SIMPLICITY WITHIN COMPLEXITY

- * Not just developers, but installers – With thousands of balcony and commercial projects delivered, **we Know how to simplify installation.**
- * Smart & Easy Balustrade Solutions, Backed by years of TOMAK'S Experience

Glass Kit - $5/16'' + 1/16''$ SGP + $5/16''$	GK-11/16"
Glass Kit - $3/8'' + 1/32''$ SGP + $3/8''$	GK-13/16"
Glass Kit - $3/8'' + 1/16''$ SGP + $3/8''$	GK-27/32"
Top Top - Cover	TTC62-1
Top Floor - Cover	TFC62-2

** Different finishes are available upon request.

*** For End Caps, Handrails & Accessories - See page 28 - 30 of this manual.

- 1 Profile TK-6200
- 2 Compatible with glass using SGP lamination:
5/16" + 1/16" + 5/16"
5/16" + 1/16" + 5/16"
3/8" + 1/16" + 3/8"
3/8" + 1/16" + 3/8"
- 3 Aluminum top cover rail
- 4 Rear stabilization profile for glass: P.P + GF 20%
- 5 Glass tilting and leveling mechanism: P.P + GF 20%
- 6 Triple locking mechanism (3-action): P.P + GF 20%
- 7 Sealing gaskets: EPDM
- 8 Steel angle bracket, 3/8" thick, galvanized & powder coated, spaced @ 9-7/8" c/c
- 9 Hexagon head bolt 3/8"-16 UNC x 1 3/8" + nut + 2 washers
- 10 Stainless steel threaded rod 1/2"-13 UNC x 6 3/4" + chemical anchor + HILTI + nut + washer

Glass Kit 1/8 - 1/8"

Reportnumber 89211059-02 | 12th January 2016
16.A352 - EN1991-1-1

Testresults

Test results after execution of the test(s) according to National Annex A, Static horizontal loads on parapets and wall partitions acting as barriers and National Annex B, Impact loads on parapets and wall partitions acting as barriers at a difference of heights of EN 1991-1-1 [1, 2]:

National Annex A, Static horizontal loads

Requirement	Description of the requirement	Pass/ Fail/ n.a.																					
EN 1991-1-1+National Annex A	If a partition wall, acting as barrier is mandatory for a difference in height with the surrounding floor, the surrounding terrain, or the surrounding water, a separate line load (q_k) and a concentrated load F_k , must be applied.																						
	<table border="1"> <thead> <tr> <th>Rooms</th><th colspan="2">q_{rep}</th></tr> <tr> <th></th><th>Recommended value</th><th>Test-value</th></tr> </thead> <tbody> <tr> <td>Table 6.12 Rooms category A</td><td>0,5 kN/m 1 min</td><td></td></tr> <tr> <td>Rooms category B, C1</td><td>0,5 kN/m 1 min</td><td></td></tr> <tr> <td>Rooms category C2 to C4 and D</td><td>1,0 kN/m 1 min</td><td>1,15kN</td></tr> <tr> <td>Rooms category C5</td><td>3,0 kN/m 5 min</td><td>3,45kN</td></tr> <tr> <td>An additional load was tested for future applications up to 4,35kN/m1, where the maximum value of the scale is 5,00kN. Higher loads are possible, but this could not be tested.</td><td>4,35 kN/m 5 min</td><td>5,00kN</td></tr> </tbody> </table>	Rooms	q_{rep}			Recommended value	Test-value	Table 6.12 Rooms category A	0,5 kN/m 1 min		Rooms category B, C1	0,5 kN/m 1 min		Rooms category C2 to C4 and D	1,0 kN/m 1 min	1,15kN	Rooms category C5	3,0 kN/m 5 min	3,45kN	An additional load was tested for future applications up to 4,35kN/m1, where the maximum value of the scale is 5,00kN. Higher loads are possible, but this could not be tested.	4,35 kN/m 5 min	5,00kN	
Rooms	q_{rep}																						
	Recommended value	Test-value																					
Table 6.12 Rooms category A	0,5 kN/m 1 min																						
Rooms category B, C1	0,5 kN/m 1 min																						
Rooms category C2 to C4 and D	1,0 kN/m 1 min	1,15kN																					
Rooms category C5	3,0 kN/m 5 min	3,45kN																					
An additional load was tested for future applications up to 4,35kN/m1, where the maximum value of the scale is 5,00kN. Higher loads are possible, but this could not be tested.	4,35 kN/m 5 min	5,00kN

Strength Analysis

Test results up to 3kN

Reportnumber 89211059-03 | 12th January 2016
16.A352 - EN1991-1-1

National Annex B, Impact loads on parapets and partition walls acting as barrier.

Test	Horizontal place impact soft body	Drop height in meters	Height of impact from underside construction (floor level) in mm	Dim. W x H in mm
1	Middle of width and appr. 15cm below the upper edge of sample	1,00 m	Appr. 950 mm	1150x1100mm

Requirement nr.	Description of requirement	Pass/ Fail/ n.a.
NEN-EN 1991-1-1+National Annex B	If a partition wall, acting as barrier is mandatory for a difference in height with the surrounding floor, the surrounding terrain, or the surrounding water, the prescribed impact load must be determined.	
	Gemeten/beoordeeld	
NEN-EN 1991-1-1+National Annex B	The construction is capable of withstanding the impact load, if the soft body impactor is not penetrating the construction.	Pass
NEN-EN 1991-1-1+National Annex B	...and after execution of the test, the residual strength and consistency of the construction is still intact	Pass
